

The **ML20200 Parachute Hook Knife and Pouch** is designed to allow safe storage and ease of access for the ultimate Hook Knife. The *knife* has been specifically designed and manufactured to withstand outdoor elements. The *aluminum knife handle* will accommodate a gloved hand with ease and will not rust or break with normal usage. The *knife's blade* area has been designed to provide some protection for the user from injury. The Stainless Steel *knife blade* is secured by two (2) Stainless Steel Blade Retainer Screws. The *strap* is made from durable webbing and one side finished with a reflective material for ease of identification in low lighting environments. The *snaps* are of a commercial grade and will withstand numerous releases and re-attachments of unit to the pouch. The padded *pouch* is manufactured in a brilliant orange colour, 1000 Denier Cordura and is designed for added strength and durability. The brilliant orange and reflective tape provides ease of identification for user.

This unit is easily attached to a *parachute harness chest strap*. The units are designed to withstand all types of weather and have the ability to cut a multitude of different materials such as; webbing, cord, rope, etc.
