

The **ML20250 Aircrew Safety Knife** is designed to allow safe storage and ease of access for the ultimate Hook Knife. The *aluminum knife handle* will accommodate a gloved hand with ease and will not rust or break with normal usage. The *knife's blade* area has been designed to provide some protection for the user from injury. The Stainless Steel *knife blade* is secured by two (2) Stainless Steel Blade Retainer Screws. The *strap* is made from durable webbing and one side finished with a reflective material for ease of identification in low lighting environments. The *snaps* are of a commercial grade and will withstand numerous releases and re-attachments of unit to the pouch. The padded *pouch* is manufactured of a RED coloured, 1000 Denier Cordura and is designed for added strength and durability. The brilliant Red and reflective tape provides ease of identification for user.

This unit is easily attached to an Aircraft Harness System and can accommodate up to two (2) standard Glow Sticks in a durable Mesh Pocket. The units are designed to withstand all types of weather, constant use and the knife has the ability to cut a multitude of different materials such as; webbing, cord, rope, etc.
