

The **ML6000B** Throw Bag has 6 points of attachment and manoeuvrability and is visually identifiable with reflective tape which can be seen from any direction. The Lightstick pockets allow for the bag to be seen at night as well as at the end of the rope. Detachable tri-colour ID tag permits standardized training colours of yellow, red and grey.

Lightstick Pocket

- 2 lightstick pockets on bag can be seen from 360 degrees from lateral.

Handles

- Large handles for easy accommodation of gloved hands and ease of manoeuvrability of bag.
- Bag can be handled from 6 points to PFD or tender harness

Drainage

- Composed of heavy duty nylon mesh throughout
- Will fully drain and dry
- Easy to hang for storage or drying
- Entire bag can be immersed for decontamination

Visual Identification

- Reflective tape on all of circumference and each end.
- Knotted end of rope can be visually inspected through the mesh

Reinforced Neck

- Handles high friction from rope extraction.
- Orifice drawstring allows for tension change when pulling on rope or re-stowing in rope.
